

INNOVATION IS OUR PASSION

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the fundament for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy. Continuing steadily on our sustainable innovation path and growth journey, we are looking for talented

SOFTWARE REQUIREMENTS ENGINEER FOR LUCULLUS®

our process information management system for bioprocess development

Our engineers develop next-generation technologies that change how biopharma digitizes and automates bioprocess development to fulfill its purpose and bring highly demanded new medications to patients. Lucullus® is constantly being developed as it needs to handle different kinds of information from innumerable sources within highly complex and constantly evolving environments. Our vision is to maintain this leading position and stand out significantly from all other bioprocess software applications. Your responsibilities will include but will not be limited to the following:

RESPONSIBILITIES

- **Gather and Analyze Requirements:** Collaborate with stakeholders to elicit and analyze functional and non-functional requirements.
- **Document Specifications:** Create clear and detailed requirement specifications, user stories, use cases, (UML) diagrams, acceptance criteria, etc. Maintain software documentation to ensure compliance with industry standards.
- **Ensure Product Quality:** Validate that requirements are complete, feasible, and aligned with stakeholder needs.
- **Interface with Teams:** Serve as the main point of contact between stakeholders (partners, customers, PO, software development, business & quality department) and the development team to ensure alignment.
- **Manage Requirement Changes:** Track and manage changes to requirements throughout the project lifecycle.
- **Support Testing and Quality Assurance:** Assist the QA team by providing test cases derived from requirements, ensuring all functionality is covered, and helping resolve any ambiguities or issues during test execution.
- **Continuous Improvement:** Help optimize the requirements engineering process for efficiency and quality.

YOUR PROFILE

- You have a degree in computer science, life sciences, engineering, or similar education, and three years of experience in business analysis, engineering, or software development requirements and relevant certification (e.g. IREB).
- Clear understanding of software development and requirements engineering in Agile, Waterfall, and hybrid models
- Knowledge of tools: Jira, Confluence, MS Office
- Open-minded, versatile, enthusiastic driven to take on new challenges across the board and to make a difference.
- You are goal-oriented, use systematic and structured approaches, work well independently, have strong cooperation and problem-solving skills, and interact in an international and intercultural setting
- English is required, German is a plus and a valid work permit for Switzerland is mandatory.

Only direct applicants (not via third parties such as recruitment agencies) will be accepted.

OUR OFFER

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!

Please submit your detailed curriculum vitae to hr@securecell.ch

JOB LOCATION

Securecell headquarters are in Urdorf (Zurich), Switzerland.
