

INNOVATION IS OUR PASSION

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the foundation for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy. Continuing steadily on our sustainable innovation path and growth journey, we are looking for a talented

LEAD JAVA ENGINEER

for the Software Development Team

Are you passionate about Java development and leading teams? Do you have experience in operational management and software development? If so, we might have the perfect opportunity for you!

Join our team and help us elevate our software solutions to new heights. If you are committed to delivering excellence and driving innovation in everything you do, we would love to hear from you!

YOUR TASKS

- **Operational Management:** Lead the Lucullus Java Development teams, ensuring smooth operational management and execution of software development tasks. The teams consist of both Java Developers and Frontend Developers.
- **Team Leadership:** Manage personnel, technical, and administrative aspects of the team.
- **Resource Planning:** Plan resource needs for the team to ensure efficient project execution.
- **Product Development:** Drive the development of our standard software products, ensuring high quality and performance.
- **Customer Projects:** Prioritize development activities in collaboration with the Product Owner Software, participate in customer-specific IT projects, and provide 3rd-level support for customers.
- **Innovation and Collaboration:** Foster a culture of collaboration, innovation, and continuous improvement within the team.
- **Emerging Trends:** Stay updated with emerging trends, technologies, and methodologies in backend development, and incorporate relevant advancements into project strategies.
- **Software Development Lifecycle:** Engage in the entire software development lifecycle, from requirement analysis and design to development, testing, deployment, and maintenance.
- **Coding Standards:** Adhere to coding standards, best practices, and quality guidelines in backend development activities.
- **General Tasks:** Select suitable software tools, manage and supervise external capacities, and ensure comprehensive software and process documentation.

YOUR PROFILE

- Educational Background: Master's degree in Information Technology, Computer Science, or a related field.
- Experience: Proven experience in Java development (at least 6 years) and leading teams (at least 3 years).
- Technical Skills: Strong proficiency in Java and related technologies, with a focus on pushing the Java engineer level. Good knowledge of the Spring framework and RESTful services. Knowledge of database development (JDBC/Hibernate/JPA). Experience in front-end technologies (HTML5, CSS, JavaScript, Vue.js) is advantageous.
- Project Management: Experience in planning resource needs, prioritizing development activities, and participating in customer-specific IT projects.
- Communication: Excellent communication skills and fluency in English, both written and spoken.
- Problem-Solving: Ability to solve complex technical problems and ensure high-quality software development.
- Additional Skills: Experience with automation/communication protocols, (bio-)process engineering, Windows and Linux operating systems, and the Atlassian tool suite.
- You have a valid work permit for Switzerland, and we accept only direct applicants (no agencies).

COMPETENCIES

- Leadership: Create an environment where team members can excel and demonstrate solid leadership and motivational skills.
- Customer Mindset: Strong focus on customer satisfaction and quality.
- Innovation: Drive innovation and encourage creative solutions within the team.
- Trust and Influence: Build trust with teammates and influence stakeholders effectively.
- Results-Driven: Demonstrate a results-oriented approach and the ability to get things done efficiently.
- Independent Work: Goal-oriented, able to work well independently, and use strong problem-solving skills in collaboration with the team.

OUR OFFER

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!
